### Description

Arginase catalyzes the hydrolysis of arginine to ornithine and urea. At least two isoforms of mammalian arginase exist (types I and II) which differ in their tissue distribution, subcellular localization, immunologic crossreactivity and physiologic function. [RefSeq]

### Application Notes

Optimal dilution of the Arginase 1 antibody should be determined by the researcher.

### Immunogen

A synthetic peptide specific to human Arginase 1 / ARG1 was used as the immunogen for the Arginase 1 antibody.

## **Storage**

Store the Arginase 1 antibody at -20oC.
