Description

V-type proton ATPase subunit G 3 is the catalytic subunit of the peripheral V1 complex of vacuolar ATPase (V-ATPase). V-ATPase is responsible for acidifying a variety of intracellular compartments in eukaryotic cells.

Application Notes

The stated application concentrations are suggested starting points. Titration of the ATP6V1G3 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 15-49 from human V-type proton ATPase subunit G 3 was used as the immunogen for the

ATP6V1G3 antibody.

Storage

Aliquot the ATP6V1G3 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
