IHC analysis of FFPE human lymph tissue with BCL6 antibody

Western blot analysis of BCL6 antibody and mouse cerebellum tissue lysate. Predicted molecular weight: 78~100 kDa.

BCL6 antibody flow cytometry analysis of Jurkat cells (bottom histogram) compared to a [negative control](#) (top histogram). FITC-conjugated goat-anti-rabbit secondary Ab was used for the analysis.

Description

BCL6 is a zinc finger transcription factor and contains an N-terminal POZ domain. This protein acts as a sequence-specific repressor of transcription, and has been shown to modulate the transcription of START-dependent IL-4 responses of B cells. This protein can interact with a variety of POZ-containing proteins that function as transcription corepressors.

Application Notes

Titration of the BCL6 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 519-547 from the human protein was used as the immunogen for this BCL6 antibody.

Storage

Aliquot the BCL6 antibody and store frozen at -20°C or colder. Avoid repeated freeze-thaw cycles.
