Description

Calponin is a calmodulin, F-actin and tropomyosin binding protein which is thought to be involved in the regulation of smooth muscle contraction.

Application Notes

Optimal dilution of the Calponin antibody should be determined by the researcher.

Immunogen

Recombinant human protein was used as the immunogen for the Calponin antibody.

Storage

Store the Calponin antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
