Description

This antibody reacts with the extracellular domain of EGF receptor and blocks the EGF/TGFa-induced activation. It also blocks tumor growth in vivo. It is excellent for purification of EGF receptor.EGFR is type I receptor tyrosine kinase with sequence homology to ErbB2, -3 -4 or HER2, -3 -4. It binds to Epidermal Growth Factor (EGF), Transforming Growth Factor-a (TGFa), Heparin-binding EGF (HB-EGF), amphiregulin, betacellulin and epiregulin.

Application Notes

The concentration stated for each application is a general starting point. Variations in protocols, secondaries and substrates may require the antibody to be titered up or down for optimal performance.

Immunogen

Microsomes from A431 cells were used as the immunogen for this antibody.

Storage

Store the EGF Receptor antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).

Alternate Names

ErbB1; Errp; HER1; mENA; PIG61; Proto-oncogene c-ErbB1; Receptor Tyrosine Protein Kinase; Urogastrone; Wa2; Wa5, EGF Receptor antibody
