Description

Aspartate aminotransferase, cytoplasmic is an enzyme that in humans is encoded by the GOT1 gene. Glutamic-oxaloacetic transaminase is a pyridoxal phosphate-dependent enzyme which exists in cytoplasmic and mitochondrial forms, GOT1 and GOT2, respectively. GOT plays a role in amino acid metabolism and the urea and tricarboxylic acid cycles. The two enzymes are homodimeric and show close homology.

Application Notes

Optimal dilution of the GOT1 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids S5-Q413) was used as the immunogen for the GOT1 antibody.

Storage

After reconstitution, the GOT1 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
