Description

Homer protein homolog 1 or Homer1 is a neuronal protein that in humans is encoded by the HOMER1 gene. This gene encodes a member of the homer family of dendritic proteins. Members of this family regulate group 1 metabotropic glutamate receptor function.

Application Notes

Optimal dilution of the HOMER1 antibody should be determined by the researcher.

Immunogen

An E. coli-derived human protein (amino acids D135-S354) was used as the immunogen for the HOMER1 antibody.

Storage

After reconstitution, the HOMER1 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
