Description

The INPP4B gene encodes the inositol polyphosphate 4-phosphatase type II, one of the enzymes involved in phosphatidylinositol signaling pathways. This enzyme removes the phosphate group at position 4 of the inositol ring from inositol 3,4-bisphosphate. [RefSeq]

Application Notes

Optimal dilution of the INPP4B antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human INPP4B / Type II inositol 3,4-bisphosphate 4-phosphatase was used as the immunogen for the INPP4B antibody.

Storage

Store the INPP4B antibody at -20oC.
