Western blot testing of mouse lung tissue lysate with IPO9 antibody. Predicted molecular weight ~116 kDa, but it is often observed at higher molecular weights due to protein complexing.

Western blot testing of human HeLa cell lysate with IPO9 antibody. Predicted molecular weight ~116 kDa, but it is often observed at higher molecular weights due to protein complexing.

Description

Importin 9 is a nuclear transport receptor that mediates nuclear import of proteins, such as histones, proteasome and actin. [UniProt]

Application Notes

Optimal dilution of the IPO9 antibody should be determined by the researcher.

Immunogen

A synthetic peptide from human Importin 9 protein was used as the immunogen for the IPO9 antibody.

Storage

Store the IPO9 antibody at -20oC.
