Description

Cytochrome c oxidase is the component of the respiratory chain that catalyzes the reduction of oxygen to water. Subunits 1-3 form the functional core of the enzyme complex. Subunit 2 transfers the electrons from cytochrome c via its binuclear copper A center to the bimetallic center of the catalytic subunit 1. [UniProt]

Application Notes

Optimal dilution of the MTCO2 antibody should be determined by the researcher.

Immunogen

A synthetic peptide specific to human MTCO2 was used as the immunogen for the MTCO2 antibody.

Storage

Store the MTCO2 antibody at -20oC.
