Description

The protein encoded by this gene belongs to the NALP protein family. Members of the NALP protein family typically contain a NACHT domain, a NACHT-associated domain (NAD), a C-terminal leucine-rich repeat (LRR) region, and an N-terminal pyrin domain (PYD). This protein may play a regulatory role in the innate immune system as similar family members belong to the signal-induced multiprotein complex, the inflammasome, that activates the pro-inflammatory caspases, caspase-1 and caspase-5.

Application Notes

Optimal dilution of the NALP9 antibody should be determined by the researcher.

Immunogen

E. coli-derived recombinant human protein (amino acids H118-H746) was used as the immunogen for the NALP9 antibody.

Storage

After reconstitution, the NALP9 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
