Description

UCHL1 is a member of a gene family whose products hydrolyze small C-terminal adducts of ubiquitin to generate the ubiquitin monomer. Expression of UCHL1 is highly specific to neurons and to cells of the diffuse neuroendocrine system and their tumors. It is present in all neurons.

Application Notes

Titration of the PGP 9.5 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 187-214 from the human protein was used as the immunogen for this PGP 9.5 antibody.

Storage

Aliquot the PGP 9.5 antibody and store frozen at -20°C or colder. Avoid repeated freeze-thaw cycles.
