Description

Prohibitin inhibits DNA synthesis. It has a role in regulating proliferation. As yet it is unclear if the protein or the mRNA exhibits this effect. May play a role in regulating mitochondrial respiration activity and in aging.

Application Notes

Titration of the PHB1 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

This PHB1 antibody was produced from a mice immunized with a recombinant protein between 1-205 amino acids from the human protein.

Storage

Aliquot the PHB1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
