Western blot analysis of lysate from (1) HepG2 cell line and (2) human lung tissue lysate using RAGE antibody at 1:1000. Predicted molecular weight: 45-55kDa depending on glycosylation level.

Description

RAGE is able to phosphorylate several exogenous substrates and to undergo autophosphorylation.

Application Notes

Titration of the RAGE antibody may be required due to differences in protocols and secondary/substrate sensitivity.

Immunogen

A portion of amino acids 206-234 from the human protein was used as the immunogen for this RAGE antibody.

Storage

Aliquot the RAGE antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
