

# Recombinant CD19 Antibody [clone rCD19/4591] (V8656)

Catalog No.	Formulation	Size
V8656-100UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	100 ug
V8656-20UG	0.2 mg/ml in 1X PBS with 0.1 mg/ml BSA (US sourced) and 0.05% sodium azide	20 ug
V8656SAF-100UG	1 mg/ml in 1X PBS; BSA free, sodium azide free	100 ug

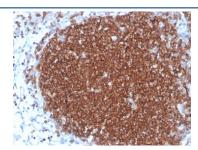

## Recombinant MOUSE MONOCLONAL

## **Bulk quote request**

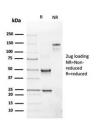

Availability	1-3 business days
Species Reactivity	Human
Format	Purified
Clonality	Recombinant Mouse Monoclonal
Isotype	Mouse IgG2a, kappa
Clone Name	rCD19/4591
Purity	Protein G affinity chromatography
UniProt	P15391
Localization	Cell surface, cytoplasmic
Applications	Immunohistochemistry (FFPE): 1-2ug/ml for 30 minutes at RT
Limitations	This recombinant CD19 antibody is available for research use only.

IHC staining of FFPE human lymph node with recombinant CD19 antibody. HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

IHC staining of FFPE human lymph node with recombinant CD19 antibody. HIER: boil tissue sections in pH 9 10mM Tris with 1mM EDTA for 20 min and allow to cool before testing.

SDS-PAGE analysis of purified, BSA-free recombinant CD19 antibody as confirmation of integrity and purity.

### **Description**

CD19 is a transmembrane glycoprotein that contains two extracellular immunoglobulin-like domains. CD19 is present in both benign and malignant B-cells and is considered to be the most reliable surface marker of this lineage over a wide range of maturational stages. In normal lymphoid tissue, CD19 is observed in germinal centers, in mantle zone cells, and in scattered cells of the inter-follicular areas. Anti-CD19 exhibits an overall immunoreactivity pattern similar to those of the antibodies against CD20 and CD22. However, in contrast to CD20, expression of CD19 is continuous throughout B-cell development and through terminal differentiation of B-cells into plasma cells. Anti-CD19 positivity is seen in the vast majority of B-cell neoplasms commonly at a lower intensity than normal B-cell counterparts. Plasma cell neoplasms are nearly always negative, as are T-cell neoplasms.

#### **Application Notes**

Optimal dilution of the recombinant CD19 antibody should be determined by the researcher.

#### Immunogen

A portion of amino acids 456-556 from the human protein was used as the immunogen for the recombinant CD19 antibody.

#### **Storage**

Store the recombinant CD19 antibody at 2-8oC (with azide) or aliquot and store at -20oC or colder (without azide).
