## Description

Semaphorin-3B is a protein that in humans is encoded by the SEMA3B gene. It is mapped to 3p21.31. The semaphorin/collapsin family of molecules plays a critical role in the guidance of growth cones during neuronal development. The secreted protein encoded by this gene family member is important in axonal guidance and has been shown to act as a tumor suppressor by inducing apoptosis.

## Application Notes

Optimal dilution of the SEMA3B antibody should be determined by the researcher.

## Immunogen

Recombinant human protein (amino acids Y55-R624) was used as the immunogen for the SEMA3B antibody.

## Storage

After reconstitution, the SEMA3B antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
