Description

Solute carrier family 22 member 10 (SLC22A10), also known as organic anion transporter 5 (OAT5), is a protein that in humans is encoded by the SLC22A10 gene.

Application Notes

Optimal dilution of the SLC22A10 antibody should be determined by the researcher.

Immunogen

An E.coli-derived human recombinant protein (amino acids N290-A541) was used as the immunogen for the SLC22A10 antibody.

Storage

After reconstitution, the SLC22A10 Antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
