## Description

SMAD7 is a member of the MAD-related family of molecules. MAD-related proteins are a recently identified family of intracellular proteins that are thought to be essential components in the signaling pathways of the serine/threonine kinase receptors of the transforming growth factor beta super family.

## Application Notes

Titration of the SMAD7 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 195-224 from the human protein was used as the immunogen for this SMAD7 antibody.

## Storage

Aliquot the SMAD7 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
