Description

Serine/threonine-protein kinase 24 (STK24), also called Mammalian STE20-like protein kinase 3 (MST-3) is an enzyme that acts on both serine and threonine residues and promotes apoptosis in response to stress stimuli and caspase activation.

Application Notes

Optimal dilution of the STK24 antibody should be determined by the researcher.

Immunogen

Recombinant human protein (amino acids M1-Y433) was used as the immunogen for the STK24 antibody.

Storage

After reconstitution, the STK24 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
