

Tead3 Antibody / TEA domain family member 3 (RQ7534)

Catalog No.	Formulation	Size
RQ7534	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

Bulk quote request

Availability	1-3 business days
Species Reactivity	Mouse, Rat
Format	Antigen affinity purified
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Antigen affinity purified
Buffer	Lyophilized from 1X PBS with 2% Trehalose
UniProt	Q99594
Applications	Western Blot : 0.5-1ug/ml
Limitations	This Tead3 antibody is available for research use only.

Western blot testing of 1) rat heart and 2) mouse heart tissue lysate with Tead3 antibody. Predicted molecular weight ~49 kDa.

Description

Transcriptional enhancer factor TEF-5 is a protein that in humans is encoded by the TEAD3 gene. This gene product is a member of the transcriptional enhancer factor (TEF) family of transcription factors, which contain the TEA/ATTS DNA-binding domain. It is predominantly expressed in the placenta and is involved in the transactivation of the chorionic somatomammotropin-B gene enhancer. Translation of this protein is initiated at a non-AUG (AUA) start codon.

Application Notes

Optimal dilution of the Tead3 antibody should be determined by the researcher.

Immunogen

Amino acids RKKVREYQVGIKAMNLDQ were used as the immunogen for the Tead3 antibody.

Storage

After reconstitution, the Tead3 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
