

THBS2 Antibody / Thrombospondin 2 (RQ4469)

Catalog No.	Formulation	Size
RQ4469	0.5mg/ml if reconstituted with 0.2ml sterile DI water	100 ug

Bulk quote request

Availability	1-3 business days
Species Reactivity	Mouse, Rat
Format	Antigen affinity purified
Clonality	Polyclonal (rabbit origin)
Isotype	Rabbit IgG
Purity	Antigen affinity
Buffer	Lyophilized from 1X PBS with 2% Trehalose and 0.025% sodium azide
UniProt	P35442
Localization	Cytoplasmic
Applications	Western Blot : 0.5-1ug/ml
Limitations	This THBS2 antibody is available for research use only.

Western blot testing of 1) rat brain and 2) mouse brain lysate with THBS2 antibody at 0.5ug/ml. Expected molecular weight: 130-170 kDa depending on glycosylation level.

Description

Thrombospondin-2 (THBS2) is a protein that in humans is encoded by the THBS2 gene. The protein encoded by this gene belongs to the thrombospondin family. The THBS2 is mapped to 6q27 and it is located on chromosome 17. The gene was transcribed in fibroblasts, smooth muscle cells, and an osteosarcoma cell line. It functions as a protein inhibitor of tumor growth and angiogenesis and modulates the cell surface properties of mesenchymal cells and be involved in cell adhesion and migration.

Application Notes

Optimal dilution of the THBS2 antibody should be determined by the researcher.

Immunogen

Amino acids DHVKDTSFDLFSISNINRKTIGAKQFRGPD were used as the immunogen for the THBS2 antibody.

Storage

After reconstitution, the THBS2 antibody can be stored for up to one month at 4oC. For long-term, aliquot and store at -20oC. Avoid repeated freezing and thawing.
