Description

TRPS1 is a transcriptional repressor that binds specifically to GATA sequences and represses expression of GATA-regulated genes at selected sites and stages in vertebrate development.

Application Notes

Optimal dilution of the TRPS1 antibody should be determined by the researcher.

Immunogen

A recombinant partial protein sequence (within amino acids 900-1100) from the human protein was used as the immunogen for the TRPS1 antibody.

Storage

Aliquot the TRPS1 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
