Description

ULK1 is an enzyme that in humans is encoded by the ULK1 gene. It is mapped to 12q24.33. Unc-51 like autophagy activating kinase (ULK1/2) are two similar isoforms of an enzyme that in humans are encoded by the ULK1/2 genes. It is specifically a kinase that is involved with autophagy, particularly in response to amino acid withdrawal. Not many studies have been done comparing the two isoforms, but some differences have been recorded.

Application Notes

Optimal dilution of the ULK1 antibody should be determined by the researcher.

Immunogen

Amino acids EETLMEQEHTTEILRGLRFTLLFVQHVLEIAALK from the human protein were used as the immunogen for the ULK1 antibody.

Storage

After reconstitution, the ULK1 antibody can be stored for up to one month at 4°C. For long-term, aliquot and store at -20°C. Avoid repeated freezing and thawing.
