Western blot testing of human MCF-7 cell lysate with USP32 antibody at 1:1000.  
Predicted molecular weight: 182 kDa.

## Description

USP32 (ubiquitin specific peptidase 32) catalyzes the conversion of a ubiquitin C-terminal thioester to a free ubiquitin and a thiol. It contains one DUSP domain and three EF-hand calcium binding domains and is localized to membranes in a lipid-anchored fashion.

## Application Notes

Titration of the USP32 antibody may be required due to differences in protocols and secondary/substrate sensitivity.

## Immunogen

A portion of amino acids 438-470 from the human protein was used as the immunogen for the USP32 antibody.

## Storage

Aliquot the USP32 antibody and store frozen at -20oC or colder. Avoid repeated freeze-thaw cycles.
